PROJECTS

RentWise - Household Expense & Affordability Tracker | [GitHub](#)

Aug 2026

- Engineered a responsive household expense tracker using core web technologies.
- Developed JavaScript logic for equal and income weighted cost splits.
- Built dynamic affordability dashboards to monitor safe household spending limits.
- Designed seamless interfaces with live color theming and dark mode.
- **Tech Stack:** HTML5, CSS3, Vanilla JavaScript, DOM Manipulation

AI Browser Assistant | [Google AI Studio](#)

Jun 2026 - Jul 2026

- Built an AI Browser Assistant using JavaScript, CSS, and Google AI Studio, allowing users to talk to web pages using simple language.
- Programmed natural chat features using Google AI that talk like a real human and search Google or Wikipedia for live facts.
- Hosted and published the project directly on Google AI Studio, making it free and open for anyone to test and use.
- Designed a strict security sandbox using JS to block the assistant from accessing live page data, ensuring total user privacy.
- **Tech Stack:** Google AI Studio (Gemini API), JavaScript (JS), CSS, Web APIs (Google Search & Wikipedia Integration)

IoT Arduino-based alert and protection system |

Nov 2025 - Dec 2025

- Built an automated farm security system using Arduino/ESP32, allowing 24/7 continuous monitoring near wildlife sanctuary borders.
- Created a smart verification system in C programming, combining a laser - LDR tripwire with an ultrasonic sensor to stop false alarms.
- Programmed an automatic alarm system handling 2 local alerts, turning on bright strobe lights and loud sounds when animals cross the fence.
- Added a remote warning system notifying 2 groups of people - farmers and forest rangers - using instant mobile phone alerts.
- **Tech Stack:** Embedded C/C++, Arduino/ESP32, Blynk IoT API, Laser Optoelectronics, Ultrasonic Sensors, GPIO Relay Drivers
